

BETTERCALLZAAL STRATEGIES

**Back my work.
I'm in yours.**

My fund to help artists full-time.

THE PROBLEM

Streaming pays artists \$0.003 a play. Platforms own the audience and the data.

The tools to fix it exist. The gap is people who can build them AND make the right introductions.

WHAT I DO

Build the infrastructure, or make the right introduction.

That is the work. I have done it for free, for years, for my community, around a day job. This fund removes the cap.

THE RECEIPTS

950

live WaveWarZ battles, payouts straight to artists

459+ SOL

traded on songs, in real time

250+

artists in The ZAO, from zero in 3 years

80+

open-source repos, built in public

Plus 400+ newsletters, the FarHack 2026 Snap win, and a \$1.5M robotics project at 7x throughput.

PROOF

"Without Zaal, WaveWarZ would not be dominating Web3 Music. This is your GUY."

Hurric4n3Ike, co-founder, WaveWarZ

THE OFFER

One reward: In Your Corner.

You back my work. I'm in yours: my teardown on what you are building, time to connect, intros to my 250+ network, and my tools and agent stack put to work on what matters to you.

HOW IT WORKS

- 01** Back the fund and send me your thing.
- 02** I tear it down async, you get real notes fast.
- 03** We connect and focus on what moves the needle.
- 04** You get a plan, and I am in your corner going forward.

WHO I HELP

Web3 music - markets,
payouts, distribution

AI agents - real
deployments, not demos

Farcaster - mini apps and
Snaps

Communities - governance
that actually runs

WHY NOW

I have built the fix in public for years. Time to do it full-time, for more people than my own projects.

Every backer helps me show up for the people building real things, instead of squeezing it into nights and weekends.

THE ASK

Back this fund.

You get my teardown, my time, my network, my stack. One backer, one corner.
